

Water Amenities Report 6.17.25

Boat Landing

The old handrail along the north part of the boat launch has been removed. New signage has been installed. One last sign will be installed later this week. To make it a little neater, screening has been ordered to go around the posts where the power box and power pole are located.

Now that the dirt has settled around the new bulkhead, Water Amenities will rake it down and seed this area.

We are still looking into options for moving the concrete piled up at the landing.

Dredging

Water Amenities met with the board on Monday, June 16th to bring them up to date on dredging deadlines and finances. The W.W.P.O. continues to collect money for dredging.

As always, if anyone sees a hazard or has any concerns, please reach out to the W.P.A. office in writing.

Thank you.

Adam Anderson, Chris Carroll – Cochairmen, WPA Water Amenities
